Min 03/03/2024	Discussion on Current Waste Disposal Systems and Proposed Recycling Initiatives in Municipal Zones 1. Assessment of Current Waste Disposal Systems (Waste Bins in Municipal Zones) The municipal manager took the citizen through a review of the existing waste disposal systems, particularly the waste bins placed across the municipal zones. Key points discussed included: - The current placement, capacity, and distribution of bins within each zone. - Concerns were raised regarding the effectiveness of the bins, particularly in terms of volume capacity and accessibility. - Some areas were identified as lacking adequate bin coverage, leading to waste overflow. - Community members provided feedback on the frequency of waste collection, noting some bins are overflowing, which is contributing to unhygienic conditions in certain zones. 2. Introduction of New Waste Management Policies and Recycling Initiatives The forum discussed the introduction of new policies aimed at improving waste management and encouraging recycling: - It was proposed that waste segregation should become mandatory for residents in all zones, with clear instructions for separating organic, recyclable, and general waste. - The introduction of additional clearly labeled waste bins for recyclables and organic waste was agreed upon for designated areas within the zones. - Attendees highlighted the importance of ensuring that bins are regularly maintained and replaced to prevent overflow and maintain cleanliness. - A public education campaign was suggested to raise awareness about waste segregation and proper disposal methods. 3. Action Point: Pilot Recycling Program at Waste Bins in Municipal Zones The Kajiado Municipality Technical Team presented a proposal to launch a pilot recycling program in selected zones. The plan includes: - Placement of separate bins for recyclables and general waste to facilitate better waste management.
